### WHAT SHALL BE DONE ?

RALEIGH, N. C., Feb. 1, 1885.  
The situation of our Farmers, and more especially of those in the Eastern Counties, is a serious one. With cotton at 8½ cents and everything else in the same proportion, it is doubtful whether our people can make cotton at all with the old method. Thousands of thoughtful men all through the South are considering earnestly this question: WHAT SHALL BE DONE? With prices of their products way down and the prices of all they buy not reduced in the same proportion, what shall be done to feed the family, buy clothes and send the children to school during this New Year? All this time sensible men are cutting down every expense and resolving that they will make more at home. Milk, meat, vegetables must be made in larger quantities and groceries saved; corn, oats and grass must be provided for the horses, cows and hogs. High-priced fertilizers and every extra thing are entirely out of the question. The wise man will buy the cheapest and best ingredients only and make fertilizers at home this year.

At this time, THE NORTH CAROLINA PHOSPHATE COMPANY, an exclusively North Carolina Company, working nothing but North Carolina material, wants to inform the prudent men just described how they can help themselves and help a home enterprise by buying LIME PHOSPHATE, the cheapest Phosphate ever sold in North Carolina. It is to the interest of every farmer in North Carolina to write to the NORTH CAROLINA PHOSPHATE COMPANY at Raleigh, N. C., and learn how to save money and make a good fertilizer that will make a good crop at a very low price.
